

species		
	species_id	integer
	species_name	varchar(30)

one-to-many:

a species can have many animals, but an animal can only have one species.

potential_owners		
	owner_id	integer
	has_other_pets	boolean

many-to-many:

a potential owner can match with many animals and an animal can match with many owners.

Matches is the association table between potential_owners and animals.

matches		
	match_id	integer
	animal_id	integer
	owner_id	integer

animals		
	animal_id	integer
	species_id	integer
	size	varchar(10)
	color	varchar(20)
	good_with_pets	boolean
